

# Tanning Tips

- An indoor tanning lotion should be used every time you tan.
- Always wear protective eye goggles.
- Do not tan more than once in a 24 hour period.
- If you experience any redness at all, wait until it goes away completely before you continue tanning.
- Do not use outdoor lotions or oils of any kind, this will slow down your indoor tanning results and can be harmful to the acrylics on the beds.
- If you are trying to achieve the "all-over tan" be careful of areas where the sun has not shined before. You may want to cover these areas part of the time for the first few sessions.
- For more even tanning, shift your position in the tanning bed every now and then.
- Clean skin tans the best. Make-up should be removed before tanning.
- Contact lenses should be removed to prevent dryness.
- If you do not tan outside or if you are on photosensitive medication you should not attempt to tan indoors.

*Experience the Difference!*

- The Regions Most Cutting Edge Tanning Centers
